Passionate web developer with a robust background in web development, web design, and dynamic web applications. Proficient in HTML, CSS, JavaScript, React.js. Demonstrates excellent problem-solving, research, and collaboration skills.

TECHNICAL SKILLS

Languages:: HTML, CSS, JavaScript, React.js, Motion, Tailwind CSS

Tools: VS Code, Github, Netbeans

INTERNSHIP

Markytics Ai

Sep 2024 – Jan 2024

React Js Intern

- Contributed to the development of the company's production web applications, completing tasks across more than three projects.
- Created an HRMS web application to display month-wise data for every employee, including an export-to-Excel functionality that downloads table data in Excel format.
- Implemented chat data handling with API integration, ensuring seamless communication functionality within the application.
- Designed and integrated bar charts and pie charts to visualize data insights effectively.
- Added a loader to improve user experience while fetching API data, ensuring a smooth and responsive interface.

Sunanda Infotech Pvt Ltd

Mar 2023 – July 2023

Web Developer Trainee

- Created an Event Organizer app for managing and tracking events with real-time updates.
- Implemented user authentication, event registration, and notifications using HTML, CSS, JavaScript, and SQL.
- Designed a database schema to efficiently manage event details and attendees.

PROJECTS

Portfolio

[View Project](#)

Languages

HTML, CSS, JavaScript, React.js

Description: Developed and designed a responsive portfolio website using HTML, CSS, JavaScript, and React, showcasing my projects and skills.

- Showcased various personal projects including a calculator app, mini calendar, and digital clock, each demonstrating my proficiency in front-end development.

Blogging App

[View Project](#)

Languages

HTML, CSS, JavaScript, React.js

Description: A simple and elegant blogging application that displays the blog list based on data stored in a JSON file.

- Blogs are dynamically rendered based on user input and stored in db.json.
- Users can add a blog by providing a title, author name, and description.
- Data persistence is handled using a JSON-based API for fetching and storing blogs.
- On hovering over a blog, a delete icon appears, allowing users to remove specific blogs.
