SUMMARY

Passionate MERN Stack Developer with hands-on experience building dynamic and responsive web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in front-end and back-end development, API integration, and real-world problem-solving. Known for writing clean code, delivering user-focused solutions, and owning projects end-to-end.

TECHNICAL SKILLS

Languages & Frameworks: HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, Tailwind CSS

Tools & Platforms: VS Code, GitHub, ThunderClient, Render, Netlify

INTERNSHIP

Markytics

Sep 2024 – Jan 2024

Frontend Developer Intern

- Built an HRMS platform allowing HR to view employee details such as leaves, status, salary, and punch-in/out times.
- Developed a client dashboard system to display individual client data, including joining date, transaction history, and analytics.
- Integrated interactive charts to visualize client-related analytics for better insights.
- Fixed real-time communication in an AI-powered call bot to handle reminders and display conversation history.
- Created modular and reusable React components to improve maintainability.

Sunanda Infotech Pvt Ltd

Mar 2023 – July 2023

Web Developer Trainee

- Optimized an Event Organizer app for managing and tracking events with real-time updates.
- Implemented user authentication, event registration, and notifications using HTML, CSS, JavaScript, and SQL.
- Designed a database schema to efficiently manage event details and attendees.

PROJECTS

Portfolio

Tech Stack

MERN Stack

Overview: Designed and developed a fully responsive personal portfolio website to highlight technical skills, professional background, and project experience.

- Designed and built a responsive portfolio to showcase technical skills and projects.
- Showcased individual projects to demonstrate hands-on proficiency functional logic implementation.
- Focused on performance, accessibility, and cross-device compatibility.

Expense Tracker

[View Project](#)

Tech Stack

MERN Stack

Overview: A full-stack expense tracking application enabling authenticated users to manage, analyze, and visualize transactions with a secure and responsive interface.

- Built and deployed a full-stack expense tracker with JWT-based auth and full CRUD features.
- Built a fully responsive, mobile-friendly UI using Tailwind CSS with dynamic charts and reports for data visualization.
- Designed RESTful APIs and MongoDB schema for secure, scalable data handling.
- Used React Hooks for state management and Axios for API communication.
- Deployed the application on Render with proper environment configuration and CORS handling.
